Local Internet Solutions Provider Begins Servicing Apartment, Hotel and Business Parks

Contact: Chris Phillips

"Dakota Internet Partners (DakotaPro.biz), Southern Arizona's largest locally owned Internet Solutions Provider, announced today that they now are providing robust, fully managed, Internet solutions to large apartment complexes, hotels and business parks in Tucson.

These locations have unique Internet requirements. Any time you have a group of users sharing a resource like an Internet connection, there is bound to be problems if the system is unmanaged. For example, just a few users using streaming video can quickly degrade the services for other users. While business owners often believe that an unmanaged service will make users happier, it is quite the opposite. In every case where we provide managed services, user satisfaction improves dramatically.

Apartments, especially student housing, have extremely demanding users who will not tolerate suffer service degradations. DakotaPro.biz believes that students, as a group, represent the most demanding Internet users. They expect the service to work right every minute of every day. They are also "always connected", and notice an problem even in the middle of the night. Our management system allows us to flourish in this environment.

Whether it be property managers, hotel IT staff, or business property landlords, all have seen the value of using managed Internet Solutions from DakotaPro.biz. Our 24/7 support team is always available - which is a key distinction in our service delivery" said Chris Phillips, VP of Sales for DakotaPro.biz.

DakotaPro.biz is the business solutions division of DakotaCom.Net, which has been operating in Tucson and Southern Arizona since 1995 and has one of the most advanced networks and server collocation facilities in Southern Arizona. The company provides a wide range of broadband services and data solutions to both business and residential customers.

DakotaCom.Net received the coveted 2006 Better Business Bureau of Southern Arizona's Business Ethics Award.
