

# 5 TECHNOLOGY

**THINGS EVERY BUSINESS OWNER  
SHOULD BE DOING IN 2023**

## **Thing 1: Adapt to a Mobile Workforce**

- Route calls anywhere
- Company Chat
- Enable company video meetings
- Secure access to the company network

## Thing 2: Support Productivity By Removing Obstacles

- Great Wi-Fi everywhere in the office
- Office network that is secure, but is easy to use
- Outsource the things you are not good at so you can focus on what you are good at
- Let the experts handle the rest (like technology)

## **Thing 3: Make Sure Your Business Has a Fast, Reliable and Cost-Effective Internet Connection**

- Eliminate frustrations dealing directly with the "big guys"
- Let someone else manage that for you

## **Thing 4: Have a Strategy if You Get Hit By a Virus or Ransomware**

- Solid firewall and endpoint protection
- Ongoing backups
- Train employees not to click on ANY link in an email. Always go to the source

## At DakotaPro...

DakotaPro is a managed service provider that provides internet, networks, phones, business Wi-Fi, advanced firewalls, camera security, event Wi-Fi and more to businesses. We also provide residential wireless to customers in rural Southern Arizona.

To schedule a free business technology review, visit our website at [www.dakotapro.biz](http://www.dakotapro.biz) or give us a call at 520-745-3900
